Weight Loss—The ChiroTHIN Way

January 1, 2018

What is ChiroThin and how does it work?

ChiroTHIN is a natural dietary supplement. Its formula contains a host of nutritional ingredients that are well know to aid in fatty acid transportation, fatty acid metabolism, and blood sugar stabilization, as well as increased metabolism and detoxification.

When ChiroTHIN is combined with healthy and specific amounts of anti-inflammatory foods with a low glycemic index (low sugar), your body will be more efficient at converting stored fat into energy. In general, ChiroTHIN allows the body to more efficiently metabolize fat and use it as energy when an individual consumes fewer calories than he or she burns in a given period of time.

The ChiroTHIN formula is specially designed to include specific amounts of amino acids, vitamins, and cell salts for further added benefits. Additionally, the ChiroTHIN Weight Loss Program includes dietary and behavioral modification guidance, as well as a strategy to help maintain a long-term weight loss.

If you or someone you know is interested in a fast, effective and healthy way to lose weight contact our office at 724.223.0590 to schedule a FREE consultation to determine if you are a candidate for the program.

The average weight loss is 20-30 lbs in just 6 weeks!

Our methods are unique...because they are unique, we are often able to get results that no one else can!
